

Environmental Policy Statement

Sinclair & Rush Ltd is a leading supplier of dip & injection moulded, foam & extruded polymer products. It recognises the need for sustainable development and continually aims to improve its environmental impacts & their effects, to prevent pollution. This documented Policy aims:

To comply with the international Environmental Management System Standard ISO 14001:2004 and the approved procedures set out in the Integrated Management System Manual.

To identify & exercise control over all significant environmental aspects of the Company's products ensuring that statutory, regulatory & other requirements are met and maintained.

To communicate this Environmental Policy throughout the organisation and to other interested stakeholders as well as ensuring that these requirements are understood and met.

To understand that, in order to achieve the above, environmental objectives & targets need to be set, communicated and measured. These objectives will be detailed in the Company's Objectives & Targets Procedure.

This Environmental Policy shall be reviewed on an annual basis.
